

ViTSA Essence

The ViTSA range of dentures are quality products, skilfully handcrafted to fit you beautifully.

Fantastic natural appearance - We offer bespoke denture design with high quality, natural looking teeth and contoured gum.

Durable - ViTSA dentures are processed in an ultra high impact, fracture resistant resin.
Personal Service

Your first appointment is a complimentary, personal consultation. This is your opportunity to discuss what you would wish for from your dentures and any concerns or problems you are having. André will assess your needs and clearly explain all your options, the costs involved, the complete process and the results you can expect.

You will leave with confidence and clarity to make your decision about your care.

ViTSA Ultimate

All the features of the ViTSA Basic option combined with superior aesthetics using the top luxury range of very natural looking teeth combined with a fantastic fit for a great denture for you. This can include characterisation of denture teeth and natural contour and colouring of gums.

ViTSA Denture Refurbishing

Sometimes a brand new denture is not needed. If you like your old denture but have some issues with it like frequent fractures or rubbing on the gum, it may be possible to adjust and adapt the denture instead of making a new one.

We can also give it a “make-over” and upgrade the aesthetics which can make your old denture look new again. Please contact reception for an appointment with Andre Edmundson to discuss your options.
